# INTRODUCTION

Littlemoose (LMOOSE) is a decentralized community driven deflationary token, first launched 10 June 2021 on Binance Smart Chain (BSC). As LMOOSE is built on BSC chain, this allow transactions to be completed at a much faster speed. lower fees and more energy efficient as compared to Ethereum (ETH) chain.

LMOOSE has a high burn rate. The contract owner burned 80% immediately after launched. On top of that 4% burned automatically and 6% of auto reward to burn address after each transaction. In addition the manual burn in our schedule all reduces the total circulation of the tokens making it more valuable.

Furthermore, the initial LP was burned permanently making it locked forever. The ownership was also renounced not long after launched.

## OUR STORY

Not long after LMOOSE launched, the ownership was renounced. The first developer (contract owner) left the project in the early days and management took over by an investor, whom called himself the second developer. Together, the community has made LMOOSE growth exponential, after reaching over 3,000 investors just 10 days after launch, Trustwallet and TokenPocket logo was successfully added.

Around the end of July 2021, the second developer left the project. New LMOOSE social media and groups were created and run by a few volunteers to continue the journey.

LMOOSE was reborn on 1 August 2021.

LMOOSE Development Foundation was established on 5 August 2021. Global leaders comprise of one head and two deputy head were elected on 29 August 2021, and a work group was formed soon after.

Unfortunately, both Foundation and work group did not end well due to lack of participation and the purpose of Foundation was not for promotional purposes and thus all funds were refunded.

Despite the tough journey LMOOSE went through, the community remain strong in unity.

*“Everything originates from LMOOSE, everything depends on LMOOSE, everything is for LMOOSE, everything returns to LMOOSE.”*

From developer to investors that took over, to changing of leaders over and over until finally we now have a solid team, starting from small that is willing to volunteer. Starting from around November 2021, the new team took over. With new roadmap, website and social media, LMOOSE continue to grow strongly.

A new Foundation wallet was created for promotional purposes needed in this new LMOOSE journey.

# OUR GOAL

## OUR MISSION IS TO:

Support and help those in need. Everything we do goes back to this core mission. We want to create a product ecosystem on the blockchain that can attract participation of many from around the globe to join us in this mission together.

1. Develop technology applications including game, NFT, marketplace.
2. Use LMOOSE as payment method in many occasions (including tip payment)
3. Eventually to achieve profitability to help LMOOSE grow and donate to charity
4. Expand LMOOSE community to many other countries

## THE BIG GOALS:

- When marketcap reaches \$50 million, we will pay \$20,000 to help the charity that community chose
- Create car racing game that reaches to millions of people around the world
- LMOOSE to be accepted and recognised as a payment token internationally
- Globally recognised marketplace

*“If you can't hold, you won't be rich.”*  
—CZ Binance

## MEASURES

To work together to connect various resources worldwide, to carry out various tasks, strengthen publicity, expand consensus and work towards common goal

## VALUES

### Community

Fully community driven project and depends strongly on our LMOOSE army. Managed by a team of volunteers to move the project in positive direction.

### Diversity

Aim to make LMOOSE gain worldwide popularity and recognition. The project welcome people from all parts of the world, whether race, gender, or religion to reach consensus, collaborate and reach the common goal.

### Trust

Building trust with all investors through transparency and updates, currently contract is owner renounced, liquidity locked forever and audit (soon). Invest with a peace of mind.

# INVEST LMOOSE

Here is WHY

### Limited supply

Total supply is limited and a fixed amount. The less tokens available the higher value

### High burn rate

On top of auto burn mechanism, manual burn is done according to schedule

### Safe and secure

No rugpull as contract is low risk. Owner renounced and LP locked forever

### Auto reward

Earn passive income comfortably in your wallet through auto reward system

# OUR TEAM

Lmoose community are the team. There is no developer, no owner but leader, execution, support team and ordinary members.

The first developer launched LMOOSE and renounced on the launch date. He left the project with the second developer who again left it with the community couple of months later. Now LMOOSE is fully dependent on community.

Now we have a leader and a group of members in the team that volunteer to help in different areas.

We have designer, website developer and other members of the community that contribute in their area of expertise. Moreover, the community itself also help out in ways they can to grow LMOOSE.

*“Alone we can do so little; together we can do so much.”*

The team is split into two groups, an execution team and support team.

Execution team take up the main role including working behind the scene to make things happen. Support team assist the execution team in various ways.

# ROADMAP

## GAME PLAN

**Concept:** Car racing game with LMOOSE as the base character. There will be multiple LMOOSE characters to choose from, each with a different style and outfit. Choose from the characters available and compete with each other in different scenes. During the race, there will be obstructions including special items to be collected and used to attack opponents.

**Steps:**

## PROTOCOL

4% Burn

6% Reward

The token has been created following the principles of tokenomics. It states that for every transaction, a 10% fee is charged. 6% of the total collection is redistributed to burn address and other holders, the remaining 4% goes to a dead wallet. This means that your wallet keeps growing.

## MOOSENOMICS

Contract owner: 0.5%

Liquidity: 19.5%

Manual burn: 80%

**Total supply: 10,000,000,000,000,000,000,000,000**

Initial liquidity (Permanent): 1,950,000,000,000,000,000,000,000

Initial Burn: 8,000,000,000,000,000,000,000,000

Contract owner wallet: 50,000,000,000,000,000,000,000,000

\*Note: Ownership renounced, and contract owner has sold almost all LMOOSE right before community took over in August 2021.
